

ServiceWindow — End-to-End QA Checklist v2.1 — 2026-06-01

Final platform sweep before launch. Two accounts required: one verified truck operator, one event planner. Use separate browsers or private windows. Note bugs with page + action in section 12.

1. TEST SETUP — ACCOUNTS & ENVIRONMENT

- ☐ Truck account: existing verified truck operator, logged in
 - ☐ Planner account: existing or new event planner, logged in
 - ☐ Admin account: admin-dashboard.html access confirmed
 - ☐ Both accounts open simultaneously in separate browsers/private windows
-

2. PUBLIC-FACING PAGES

- ☐ index.html — hero, sections, CTAs visible, no JS errors in console
 - ☐ marketplace.html — truck cards display, filters work
 - ☐ marketplace.html Shift board — urgent listings appear at top of results
 - ☐ marketplace.html Shift board — urgent cards have fire-orange left border accent
 - ☐ marketplace.html Shift board — Post Emergency Coverage CTA visible for unauthenticated users
 - ☐ find-trucks.html — loads, search/filter functional
 - ☐ truck-profile.html (?id=UUID) — loads for a real truck, all fields show
 - ☐ truck-profile.html — approved docs present: "Documents on File" section visible with download links
 - ☐ truck-profile.html — no approved docs: "Documents on File" section hidden entirely (not blank)
 - ☐ truck-profile.html — Download link opens file in new tab (not 404)
 - ☐ Marketplace: click a truck card → public profile opens correctly
 - ☐ vendor-services.html — provider listings render
 - ☐ venues.html — loads correctly
 - ☐ jobs.html — loads correctly
 - ☐ pricing.html — correct pricing shown (\$39.99/mo trucks, free others)
 - ☐ auth.html — sign in/sign up tabs both load, no console errors
-

2a. SEO PAGES — SPOT CHECK (city pages + city × cuisine pages)

Spot-check 3 city pages and 3 city × cuisine pages. Verify: page loads, title tag correct, h1 matches, no JS errors, CTAs link correctly.

- ☐ fort-myers-food-trucks.html — loads, title contains "ServiceWindow", h1 visible
- ☐ naples-food-trucks.html — loads, title correct
- ☐ sarasota-food-trucks.html — loads, title correct
- ☐ fort-myers-bbq-food-trucks.html — title: "Book BBQ Food Trucks in Fort Myers, FL | ServiceWindow"

- ☐ cape-coral-tacos-food-trucks.html — title: "Taco & Mexican Food Trucks in Cape Coral, FL | ServiceWindow"
 - ☐ naples-seafood-food-trucks.html — title: "Seafood Food Trucks in Naples, FL | ServiceWindow"
 - ☐ All cuisine × city pages: "Browse [City] Trucks →" CTA links to find-trucks.html (not 404)
 - ☐ All cuisine × city pages: "List Your Truck Free" CTA links to auth.html
 - ☐ sitemap.xml — open in browser, all 25 new cuisine × city URLs present
-

3. AUTHENTICATION FLOW

- ☐ New truck signup → verification form appears → submit → pending state shown
 - ☐ New planner signup → redirected to planner-dashboard.html correctly
 - ☐ Truck login → redirects to truck-dashboard.html (not planner or admin)
 - ☐ Planner login → redirects to planner-dashboard.html
 - ☐ Admin login → redirects to admin-dashboard.html
 - ☐ Unauthenticated visit to any dashboard → redirects to auth.html
 - ☐ Logout from truck dashboard → session cleared, returns to auth.html
 - ☐ Logout from planner dashboard → session cleared, returns to auth.html
-

4. ADMIN DASHBOARD

- ☐ Admin dashboard loads, all sections visible
 - ☐ Pending truck verifications show in queue
 - ☐ Approve a truck → status updates, truck receives access
 - ☐ Reject a truck → status updates correctly
 - ☐ Document tracking section — can view truck document list and statuses
 - ☐ Document tracking — can mark a submitted document as Approved or Rejected
 - ☐ School Board Approved toggle — works on a truck profile
 - ☐ User list renders with correct roles and statuses
-

5. TRUCK DASHBOARD (Supply Side)

Profile & Setup

- ☐ Dashboard loads — all nav items visible including "Emergency Coverage"
- ☐ Profile tab: all fields editable (cuisine, radius, pricing, description, photos, certs)
- ☐ Save profile → changes persist, visible on public truck-profile.html
- ☐ Photo upload → image appears in profile
- ☐ Service radius and pricing save correctly

Compliance Documents — Upload Flow (NEW — Session 61)

- ☐ Documents tab loads — all 5 doc types listed with status badges
- ☐ Each doc row has an "Upload" button (or "Replace" if file already on file)
- ☐ Click Upload next to "Certificate of Insurance" → file picker opens, accepts PDF/JPG/PNG
- ☐ Upload a valid PDF (10 MB or less) → success toast: "Document uploaded — under review."
- ☐ After upload: row status badge updates to "Under Review", button changes to "Replace"

- ☐ Upload status message below checklist shows green confirmation text
- ☐ Upload a file larger than 10 MB → error toast with clear message (not silent fail)
- ☐ Upload an unsupported file type (e.g. .docx) → error toast with clear message
- ☐ Upload all 5 doc types without page reload — each succeeds independently
- ☐ DevTools Network: unauthenticated POST to upload-document Edge Function returns 401

Availability / Calendar

- ☐ Calendar loads on Overview or Bookings tab — no layout overflow on desktop
- ☐ Calendar loads correctly on mobile — no horizontal scroll blowout
- ☐ Mark a date unavailable → reflects correctly

Emergency Coverage

- ☐ Sidebar nav shows "Emergency Coverage" with ⚡ icon (not "My Listings")
- ☐ Emergency Coverage section header describes double-booking/can't-make-it use case
- ☐ Empty state shows: "No active emergency coverage requests"
- ☐ Empty state has NO duplicate "Post Availability" button — only toolbar Post button
- ☐ ⚡ Post Coverage toolbar button navigates to the post form
- ☐ Post form: fill all fields, submit → toast appears, row added to Active Coverage Posts table
- ☐ After posting: standby trucks receive email notification (check Edge Function logs)
- ☐ Posted coverage visible on marketplace.html Shift board with Urgent badge + orange border
- ☐ Posted coverage sorts above non-urgent listings on Shift board

Job Postings

- ☐ Jobs tab — can post a new job listing
- ☐ Job listing appears on public jobs.html
- ☐ Can edit and delete a job posting

6. BOOKING REQUEST FLOW (Core — test end to end)

Step 1: Planner creates a request

- ☐ Planner dashboard → Post Request / New Booking → form opens
- ☐ All form fields work: event name, date, time, location, cuisine, guest count, notes
- ☐ Submit → request saved, appears in planner Requests tab
- ☐ Request visible in truck dashboard Requests/Inbox tab

Step 2: Truck reviews and responds

- ☐ Truck opens inbox request — all details display correctly
- ☐ Booking times display correctly (start/end)
- ☐ Truck accepts request → booking created
- ☐ Truck declines a request → removed from inbox, planner notified
- ☐ Accepted booking appears in Bookings tab on truck side
- ☐ Accepted booking appears in Bookings tab on planner side

Step 3: Booking conflict handling

- ☐ Create a second request on same date truck already has a booking
- ☐ Conflict modal appears when truck tries to accept conflicting request
- ☐ Decline conflicting request from modal → booking removed, modal closes if none left
- ☐ Message requester from conflict modal → modal closes, Messages tab opens with thread

Step 4: Marking complete

- ☐ Truck marks booking as complete → booking status updates on both sides
 - ☐ Completion modal or rating prompt appears on truck side
 - ☐ Planner side: confirm what planner sees after truck marks complete
-

7. MESSAGING

- ☐ Truck opens Messages tab — existing threads load
 - ☐ Planner opens Messages tab — existing threads load
 - ☐ Truck sends message to planner → planner receives it in their thread
 - ☐ Planner replies → truck receives reply in same thread
 - ☐ Messages display in correct order (oldest → newest)
 - ☐ No raw HTML or unsanitized content renders in messages (XSS check)
 - ☐ Long messages wrap correctly — no overflow
 - ☐ Mobile: messages tab usable on phone screen, no layout blowout
-

8. REVIEWS & RATINGS

- ☐ Truck can rate/review planner after booking marked complete
 - ☐ Review saves and is associated with the booking
 - ☐ Public truck-profile.html — aggregate rating and booking count display correctly
-

9. PLANNER DASHBOARD (Demand Side)

- ☐ Dashboard loads — tabs visible: Requests, Bookings, Messages, Profile
 - ☐ Post a new event listing — form fields all functional
 - ☐ Browse trucks on marketplace from planner context
 - ☐ View booking history — past/active bookings listed
 - ☐ Profile/account settings save correctly
 - ☐ Notification of truck acceptance visible or emailed
-

10. STRIPE & SUBSCRIPTION

- ☐ New truck trial status shows correctly in dashboard (days remaining visible)
 - ☐ Trial truck cannot bypass paywall after trial expires
 - ☐ Upgrade flow: Stripe checkout page opens from dashboard CTA
 - ☐ After successful Stripe payment → subscription_status updates in dashboard
 - ☐ Stripe customer portal link works from dashboard
-

11. MOBILE SPOT CHECK (375px — phone or DevTools emulation)

- ☐ index.html — hero, nav, CTAs render correctly
- ☐ marketplace.html — truck cards stack correctly, no horizontal scroll
- ☐ truck-dashboard.html — all tabs accessible, no overflow; Emergency Coverage section usable
- ☐ truck-dashboard.html Documents tab — Upload buttons visible and tappable at 375px
- ☐ planner-dashboard.html — all tabs accessible, no overflow
- ☐ auth.html — sign in form usable on phone
- ☐ Messages tab — readable and scrollable on mobile
- ☐ truck-profile.html — Documents on File section stacks cleanly if docs present
- ☐ fort-myers-bbq-food-trucks.html — city × cuisine page renders correctly on mobile

12. BUGS FOUND THIS SWEEP
